

**POSTERS**

<b>1</b>	Łukasz Bąk, Feliks Stachowicz, Stanisław Noga, Andrzej Skrzat	Effect of exciting force amplitude on occurrence of para-metric resonance phenomenon in vibrating screen
<b>2</b>	Łukasz Bąk, Stanisław Noga, Feliks Stachowicz	Modelling and numerical simulation of parametric resonance phenomenon in vibrating screen
<b>3</b>	Piotr Cheluszka, Jacek Gawlik	Computer modelling of roadheader's body vibration generated by the working process
<b>4</b>	Eligiusz Idczak, Tomasz Stręk	Computational Modelling of Vibrations Transmission Loss of Auxetic Lattice Structure
<b>5</b>	Bartosz Jakubek, Wojciech Rukał	Comparison of vibration impact of an impact drill on the human body under different working conditions
<b>6</b>	Bartosz Jakubek, Roman Barczewski	Determination of acoustic parameters of devices with extensive sound sources
<b>7</b>	Jarosław Jędrysiak, Piotr Wyrwa	Higher order vibrations of thin periodic plate bands with various boundary conditions
<b>8</b>	Jarosław Jędrysiak, Pazera Ewelina	Vibrations of non-periodic thermoelastic laminates
<b>9</b>	Jarosław Jędrysiak	Free vibrations of medium thickness microstructured plates
<b>10</b>	Angelika Kosińska, Awrejcewicz Jan, Grzelczyk Dariusz	Regular and Chaotic Dynamics of a 4-DOF Mechanical System with Dry Friction
<b>11</b>	Michał Ludwicki, Zagrodny, Wiktoria Wojnicz, Jerzy Mrozowski, Jan Awrejcewicz	Influence of additional loads on chosen gait parameters and muscles activity
<b>12</b>	Martyna Rabenda	The Analysis Of The Impact Of Different Shape Functions In Tolerance Modeling On Natural Vibrations Of The Rectangular Plate With Dense System Of The Ribs In Two Directions
<b>13</b>	Krzysztof Sokół, Sebastian Uzny	Load by a force directed towards a positive pole in the aspect of studies on vibrations of a column with crack
<b>14</b>	Roman Starosta, Grażyna Sypniewska-Kamińska, Jan Awrejcewicz	Vibration of the oscillator exchanging mass with surroundings
<b>15</b>	Michał Świątek, Łukasz Domagalski, Jarosław Jędrysiak	A study on natural frequencies of Timoshenko beam with rapidly varying stiffness
<b>16</b>	Marcin Świątek, Jarosław Jędrysiak, Łukasz Domagalski	Influence of substructure properties on natural vibrations of periodic Euler-Bernoulli beams
<b>17</b>	Maciej Tabaszewski, Małgorzata Wojsznis	Analysis of Vibration Transmission in an Air-operated Demolition Hammer
<b>18</b>	Sebastian Uzny, Krzysztof Sokół, Michał Osadnik	Free vibrations of the partially tensioned geometrically non-linear system subjected to Euler's load
<b>19</b>	Nadiia Bouraou, Olga Lukianchenko, Sergiy Tsybulnik, Dmytro Shevchuk	Vibration Condition Monitoring of the Vertical Steel Tanks
<b>20</b>	Nadiia Bouraou, Oleksii Pawlovskiy, Pazdrii Olha	Improvement of the Vibration Diagnostics of Rotation Shaft Damage Based on Fractal Analysis
<b>21</b>	Mykhailo Marchuk, Goriachko Taras, Vira Pakosh	Natural Frequencies of Layered Elongated Cylindrical Panels for Geometrically Nonlinear Deformation at Discrete Consideration of Components
<b>22</b>	Waldemar Łatas	Application of the continuous dynamic absorbers in local and global vibration reduction problems in beams
